

## Project Demo Planning

|                      |                                                 |
|----------------------|-------------------------------------------------|
| <b>Date</b>          | 1 october 2026                                  |
| <b>Team ID</b>       | SW TID-2026-9739                                |
| <b>Project Name</b>  | ComicCraft-AI Comic Creator using Gemini Models |
| <b>Maximum Marks</b> | 1 Mark                                          |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                             | Description                                                                                                          | Duration (mins) | Responsible Member             |
|------|------------------------------------------|----------------------------------------------------------------------------------------------------------------------|-----------------|--------------------------------|
| 1    | Project Introduction & Problem Statement | Introduce ComicCraft and explain the problem of manually creating comic stories and illustrations.                   | 2               | <b>Janani S (Team Leader)</b>  |
| 2    | Solution & Architecture Overview         | Explain the ComicCraft workflow, FastAPI backend, Gemini AI integration and Hugging Face image generation.           | 2               | Kowsalya S                     |
| 3    | User Input & AI Story Generation         | Demonstrate entering the story prompt, character name, setting, tone and art style, followed by AI story generation. | 3               | Hemapriya K                    |
| 4    | Five-Panel Comic & Image Generation      | Demonstrate the generated five-panel comic and AI-generated illustrations for each panel.                            | 3               | Dharani M                      |
| 5    | Comic Preview & PDF Export               | Show the final comic preview and demonstrate PDF generation and download.                                            | 2               | Priyadarshi N                  |
| 6    | API Documentation & Q&A                  | Show FastAPI /docs, explain the available endpoints and answer questions from the audience.                          | 3               | <b>Janani .S (Team Leader)</b> |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                                        |
|------|----------------------------------|--------------------------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Introduce ComicCraft and explain the need for an AI-based comic creation system.                             |
| 2    | Solution Overview                | Explain the system architecture and technologies used: FastAPI, Gemini AI and Hugging Face.                  |
| 3    | Live Feature Demonstration       | Demonstrate user input, AI story generation, five-panel comic creation, AI images, preview and PDF download. |

|   |             |                                                                                                     |
|---|-------------|-----------------------------------------------------------------------------------------------------|
| 4 | Q&A Session | Answer questions related to project functionality, technologies, AI integration and implementation. |
|---|-------------|-----------------------------------------------------------------------------------------------------|
